PROFESSIONAL SUMMARY

Full Stack Developer (MERN) who has shipped real products, built a multi-tenant restaurant SaaS from scratch, freelanced on production apps for real clients, and interned at Ubisoft. Strong in REST API design, JWT auth, WebSockets, and end-to-end deployment. Used to owning features alone and iterating directly with clients.

SKILLS

Languages: JavaScript (ES6+), Python, Java, PHP

Frontend: React.js, Next.js, Tailwind CSS, PWA, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Auth, WebSockets (Socket.io), Rate Limiting, CORS

Databases: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, JIRA, Postman, Vercel, Render, Firebase, Cloudinary, VS Code

Practices: Agile, SDLC, OOP, API Design, Multi-tenant Architecture, End-to-end Deployment

EXPERIENCE

Ubisoft - Pune, India

Feb 2024 – Aug 2024

Intern Game Tester

- Designed and executed 500+ structured test cases covering functional and gameplay scenarios for pre-release game builds, directly contributing to product quality.
- Identified, documented, and tracked bugs with detailed reproduction steps, logs, and severity ratings in JIRA - improving defect resolution speed across the team.
- Collaborated with developers and designers to close critical issues before release; contributed to QA documentation and improved testing workflows.

FREELANCE PROJECTS

NexaDine – Multi-Tenant Restaurant SaaS Platform

Dec 2024 – Apr 2025

Client - Classy Castle, Pune | [GitHub](#) | [Live](#) | [Dashboard](#)

- Contracted by Classy Castle to build a multi-tenant restaurant ordering SaaS from scratch, delivered a production-ready platform enabling restaurants to manage menus, orders, and offers through one centralized system.
- Owned the complete product lifecycle: client requirements gathering, system architecture decisions, full stack development, and production deployment, with zero external engineering support.
- Built a React.js customer-facing menu UI and a separate React.js admin dashboard, with reusable components and responsive design across devices.
- Deployed full stack to production: React frontend on Vercel, Node/Express backend on Render, and database on MongoDB Atlas, maintaining 99%+ uptime for live clients.
- Iterated features directly based on client feedback, added offer management and QR-based table ordering based on specific restaurant owner requests.

FitPlay – QR-Based Gym App

Oct 2025 – Dec 2025

Client - The Iron Gym, Pune | [GitHub](#) | [Live](#)

- Engaged by The Iron Gym, Pune to solve a specific client problem: gym-goers needed instant access to exercise guidance without downloading an app delivered a QR-based solution within the project timeline.
- Built the complete platform using Next.js (frontend) and Firebase (backend + database) chose this stack specifically for real-time sync requirements and low maintenance overhead for the client
- Implemented QR code generation per exercise station users scan and instantly access guided workout instructions, reducing staff interruptions by providing self-serve guidance.

EDUCATION

BCA – Bachelor of Computer Applications | CGPA: 7.70

2021 – 2024

MIT Art's Commerce and Science College, Pune

HSC – Science (PCM) | 81.17%

2019 – 2021

Nowrosjee Wadia College, Pune
